

AGR NEXT ASIA

24-26 JUNE 2027
SETIA CITY
CONVENTION CENTRE
SHAH ALAM
MALAYSIA

The next-generation international B2B exhibition and conference platform focused on innovation, sustainability and future trends transforming the agriculture industry across ASEAN and Asia Pacific

300+

Exhibitors
(Local & International)

14,000+

Visitor

5,932

sqm of Exhibition Space

80%

of Visitors Plan Investment
after their visit

Highlights

- Showcase futuristic agritech solutions such as precision farming, digital agriculture and sustainable resource management
- Includes conferences, product launches and demonstrations of new technologies pushing the boundaries of traditional farming

Driving The Future of Sustainable Agriculture

Co-located

AgTech 国际农业科技展
INTERNATIONAL EXPO

Why Exhibits?

Cross-border trade and investment remain strong growth areas, especially with Southeast Asia economic integration

Integration of supply chain transparency and blockchain technology can boost market confidence

Digital agriculture, including IoT, AI and data analytics, is rapidly gaining interest from farmers and investors alike

The rising startup ecosystem provides fresh innovation and collaboration potential

There is increasing demand for sustainable and climate-smart farming technologies to support food security

Target Audiences

- Global agri-tech companies
- Smart farming innovators
- Government agencies
- Plantation owners
- Investors
- Startups
- Agribusiness corporations
- Distributors and importers
- Research institutions

Exhibiting Profile

- **Smart Farming & Precision Agriculture**
 - AI farming systems
 - IoT sensors
 - Farm management software
 - Drone technology
 - Satellite monitoring
 - Precision irrigation
- **Agricultural Machinery & Automation**
 - Autonomous tractors
 - Smart harvesters
 - Robotics
 - Farm automation systems
 - Packaging & post-harvest technology
- **Sustainable Agriculture & ESG**
 - Carbon farming
 - Regenerative agriculture
 - Sustainable fertilizers
 - Bio-solutions
 - Water management technology
- **Controlled Environment Agriculture**
 - Vertical farming
 - Hydroponics
 - Smart greenhouse systems
 - Indoor farming technology
- **Agri-Biotechnology**
 - Seed technology
 - Plant genetics
 - Crop science
 - Biological crop protection
- **Livestock & Aquaculture Innovation**
 - Smart aquaculture
 - Livestock automation
 - Feed technology
 - Animal health innovation
- **Future Food & Alternative Agriculture**
 - Alternative proteins
 - Agrifood innovation
 - Food traceability
 - Agri-food supply chain technology
